

Djibouti school uses Digital tools to help students continue learning during Covid-19

Customer

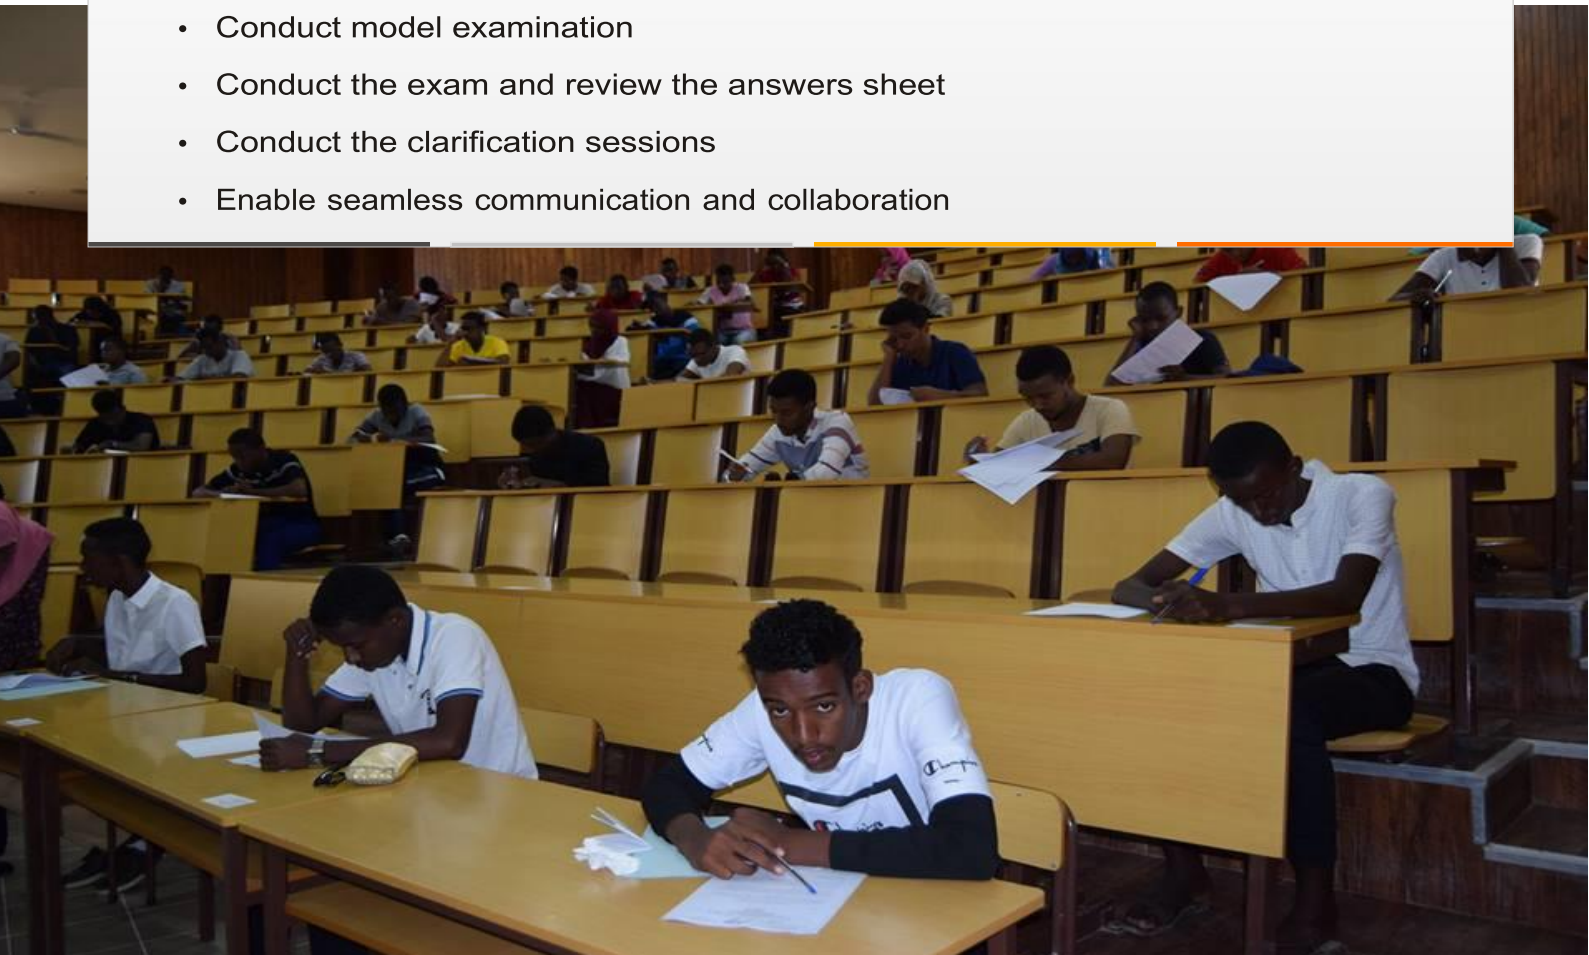

One of the schools in Djibouti had implemented NewRta's Digital examination portal, built on key components of our platform - business process management and enterprise content management, to transform their examination processes.

With the outbreak of COVID-19, the schools faced the daunting task to conduct examinations and learning without any break. They reached out to NewRta to help them in quickly shifting to the remote learning environment.

Challenge

To continue their operations smoothly, they were looking to:

- Continue education with low speed of internet
- Conduct model examination
- Conduct the exam and review the answers sheet
- Conduct the clarification sessions
- Enable seamless communication and collaboration

Enabling Training and Assessment Session

NewRta recognized the criticality of the situation and promptly helped in setting up the digital infrastructure enabling the remote working environment. To support students and teacher everyday activities and needs, the Angular, SpringBoot and SharePoint developers delivered features such as:

Enabled teachers to upload the videos and student to download or view the training videos

Made easy to prepare exam question paper, access the questions papers and answer sheet

Restricted user access for ensuring data security and integrity

Processes enabled:

- Complete Exam management
- Schedule event management
- Knowledge management
- Committee and meetings management
- Circular and note management
